PRAEFATIO.

Thesauro glossarum qui uti volent ut recte utantur pauca praemonuisse satis erit.

1. Collegi et recepi quidquid glossarum quattuor quae edita sunt voluminibus continetur, nisi quod e colloquiis, fabulis, tractatibus tertii voluminis notabiliora tantum excerpsi tritis vocabulis omnino abiectis. His addidi supplementa quaedam ab ELIA STEINMEYER ('Z. f. deutsch. Alterth.' a. 1889 p. 242 sqq., a. 1896 p. 276) et I. H. GALLEE ('Altsächs. Sprachdenkm.' ed. a. 1894 p. 331 sqq.) sive publicata sive indicata (h. e. glossas Monasterienses, Werthinenses, Monacenses), quae additamentis primi vel septimi voluminis ex ordine codicum inserentur. Sed ne erroribus quos admisit GALLEE haec sylloge irretiretur, meum et WESSNERI apographon non uno loco iam nunc secutus sum. Denique partim ex meis schedis — inprimis ex apographo libri glossarum — partim ex LOEWII, MAII, DVCANGII libris impressis, item ex PAPIAE Elementario (ed. Mediol. a. 1476) et OSBERNI Panormia (ed. A. MAI. a. 1836) glossas nonnullas exhibui, quas quidem quaestionibus glossematicis usui fore mihi persuasissem. Ex aliorum medii aevi vastis corporibus, ut HVGVCIONIS, IOHANNIS DE IANVA, MATTHAEI SILVATICI, ne nimis a consilio meo aberrare cogerer, paucula quaedam delibavi, hausta partim ex exemplaribus impressis, partim ex meis schedis, partim ex copiis DVCANGII.

2. Glossas non modo collegi aut collectas exhibui, sed pro virili parte emendavi. Scripturam librorum ubi mutavi, plenam discrepantiam olim diligenter adnotatam denuo proponere nolui, sed ea tantum quae res postulare videretur cum cura selegi, eamque omnino mihi normam esse volui, ut meras sordes erroresque librariorum abicerem, formas vero latinas sive vetustas sive recentiores sive vulgares et romanenses praeter tritissimas vilissimasque, quas ubique recoquere taedium esset, ne obscurarem. Emendationes virorum doctorum, ut SCALIGERI, VVLCANII, SALMASII, DVCANGII, O. MVELLERI, HILDEBRANDI, OEHLERI, LOEWII, BVECHELERI, ROENSCHII, HERAEI, DEVERLINGII,

FVNCKII, LANDGRAFII, KRVMBACHERI, STOWASSERI, WARRENII, NETTLESHIPII, SCHLVTTERI aliorum eo quo par est studio adscivi, quamquam neque omnes quas noveram coniecturas commemorare potui neque omnes me novisse affirmare audeo. Itaque sicubi mihi adscripsi quae iam aliorum nominibus occupata sunt, cum sine dolo malo factum sit, suum quemque repetere lubenti animo patiar.

3. Lemmata latina quibus graeca non ita pauca interposita sunt per litteras digessi. Ex interpretamentis quae ad illa lemmata pertinent potiora excerpsi, excerpta litterarum ordini tamquam lemmata inserui, ne nimis delitescerent. Quamquam cavendum fuit, ne lemmatum numero sine modo aucto ambitus libri ultra quam fas esset cresceret. In glossis botanicis quae synonyma inveniuntur non omnia excerpenda aut in lemmata vertenda duxi, cum multa ne latina quidem sint et facile ab eis, quorum interest synonymorum omnem molem novisse, inveniri possint. — Glossarum graecolatinarum praeter eas quas modo tetigi interpretamenta lemmata fieri iussi: unde consectarium fuit, ut Pseudocyrilli qui fertur diversa interpretamenta in totidem lemmata mutata pro ordine litterarum disicerentur iisdem vocabulis graecis repetitis: ubicumque tamen alterum interpretamentum ex altero demum suam lucem accipere videbatur, hoc ut indicarem varia ratione operam dedi. Si cuius intererit hoc vel illo loco integram formam cognovisse, glossam evolvat. Quod de Pseudocyrilli glossis exposui, in alias quasdam collectiones transferendum esse semel moneo. Lemmata corrupta aut suum locum habent ex ordine elementorum emendatione subiecta aut cum sanis glossis coniuncta sunt: sive hoc sive illud factum est, ut quae cohaererent facile coniungerentur quoad eius fieri potuit plerumque curavi. Participia a verbis seiunxi, ne cogerer ab adiectivis distinguere, quod saepissime nullo modo fieri potest. Placidi nota signavi et genuinas glossas Placideas et iniuria in codicibus Placido adscriptas. Glossis codicis Einsidlensis, quarum quidem auctoritas aliorum glossariorum testimoniis non firmatur, saepius *unde*? adscripsi, ut indicarem suspectae originis esse: nam earum pars certe novicia est. Indicem graecorum vocabulorum septimum volumen continebit.

4. Locos scriptorum ad quos lemmata vel interpretamenta redire videantur ubi indagaveram indicavi. Quod facile fieri potuit in glossariis ad certos auctores eosdemque pertinentibus, ut in glossis Vergilianis (IV p. 427 sqq.), Terentianis (V p. 529 sqq.), Nonianis (V p. 637 sqq.), Iuvenalianis (V p. 652 sqq.), Ciceronianis (V p. 657 sqq.), Ovidianis (V p. 546); item in glossarum farragine, quae quinti voluminis p. 410 sqq. edita est, in glossis 'de canonibus' (i. e. ex conciliorum canonibus; usus sum 'bibliotheca iuris canonici veteris, opera et

studiis Voelli et Iustelli.' Lutet. Paris. MDCLXI), 'de regulis' (scil. Sti Benedicti; usus sum editione WOELFFLINI: cf. TRAVBE, 'Textesgeschichte der Reg. S. B.' 1898 p. 97), 'de libro officiorum' (Isid. ed. Arev. VI 413 sqq.), 'de libro rotarum' (i. e. Isidori de nat. rer.), 'de libro Antonii' (i. e. vita S. Antonii interprete Euagrio; cf. Vitae patrum ed. ROSWEYD p. 36 sqq.), 'de verborum interpretatione' (h. e. de Hieronymo in Matth.; usus sum editione MIGNII), 'de Cassiano' (i. e. de Institutionibus; nam Collationes explicari non videntur), 'de Eusebio' (i. e. de Eccl. hist. interprete Rufino; usus sum editione BEATI RHENANI a. 1523), 'de Clemente' (i. e. Recognitionibus; usus sum editione GERSDORFII), 'de dialogis' (h. e. de Gregorii dialogis; usus sum editione MIGNII): in quibus glossis ad fontes revocandis egregie me iuvit OTTO B. SCHLVTTER Americanus epistulis creberrime ad me datis, quamquam nihil ex eis me desumpsisse quin ipse denuo examinaverim consentaneum est. Difficilior res fuit in eis glossariis quae ad unum scriptorem revocari non potuerunt. In quibus modo metri indicio usus sum, ut saepissime in glossis Vergilianis, Terentianis, Iuvenalianis, modo vicinitate glossarum similium, modo aliis indiciis. Quae me ipsum fugerant, BVECHELER, HERAEVS, SCHOELL adiecerunt; multa LOEWE, FVNCK, LANDGRAF, HERAEVS, alii iam occupaverant. Glossas Orosii et Aldhelmi codicis Amploniani indicavit SCHLVTTER, quem ubi certior suspicio visa est libenter secutus sum: incertiora omisi. Glossas biblicas partim ROENSCHIVS, HERAEVS, SCHLVTTER, partim ipse investigavimus. Isidori libros, Nonii compendiosam doctrinam, Festi et Pauli epitomen, Donati et Servii commentarios, Horatiana scholia, grammaticos latinos, Osberni Panormiam, glossas palaeotheodiscas et anglosaxonicas, reliqua quae cum utilitate adhiberi potuerunt, aut ipse excerpsi aut diligentes discipuli — in his inprimis P. WESSNER olim, postea E. WEISSBRODT — in meum usum excerpserunt. Glossas Livianas haud paucas in codice Casinensi 90 inesse dum plagulas emendamus perspexit HERAEVS. Sed ne quis credat me hanc quaestionis partem quae est de fontibus mihi videri absolvisse, rem incohatam potius quam ad finem perductam ipse moneo: vitam meam totam huic generi litterarum impertire me neque voluisse neque potuisse libere profiteor.

5. Glossas botanicas et medicinales tertii voluminis eodem studio, sed minore successu tractavi quam ceteras. Dioscuridis, Pseudapulei, Isidori, Matthaei Silvatici volumina, item synonyma Bartholomei diligenter versavi, indices optimos Cassii Felicis, Theodori Prisciani, Pelagonii, Plinii, Marcelli, pessimos Caelii

Aureliani aliorumque volutavi, libros BLANCARDI, LANGKAVELII, FISCHER-BENZONII inspexi, commentationes IO. SCHMIDTII, STADLERI, AVRACHERI, WELLMANNI non neglexi: quorum quidem virorum opera multa commode explicari et emendari potuerunt. Pseudapulei editione usus sum ACKERMANNI neque emendata satis et interpolata: nec dubito quin multa rectius tractaturus fuerim, si KOEBERTII editio dudum exspectata praesto fuisset. Quae his et aliis subsidiis adscitis magis grammatica fretus doctrina quam botanica conscripseram, ea dum plagulae emendantur HERMANNVS STADLER, vir etiam botanicarum quaestionum peritissimus, quem KOEBERTIVS liberaliter ad apparatum suum admisit, meo rogatu benigne oculis perlustravit, non semel supplevit aut correxit, fontes indicavit, maculas removit: cuius adnotationes marginibus adiectas quod loci angustiis pressus neque omnes neque plenas exhibere potui vehementer doleo. Formas recentissimas harum glossarum in universum temptare nolui.

6. Glossas anglosaxonicas codicum Amploniani, collegii corporis Christi Cantabrigiensis, Leidensis fieri non potuit ut prorsus excluderem: quarum quamquam haud paucae indicibus WRIGHTII et WVELCKERI, HESSELSII, DIEFENBACHII, item libris et commentationibus SWEETII, SIEVERSII, KLVGII, STEINMEYERI adhibitis a me tractari potuerunt, cum tamen multae superessent, quas ne attingere quidem auderem, FRIDERICVM KLVGE amicum certum mihique benevolentissimum, cuius auxilio iam in 'glossis nominum' edendis usus essem, denuo sollicitavi. Neque id frustra: nam is mihi de multis quaestionibus indefesso studio respondit ipsasque plagulas percurrit. Praeter KLVGIVM etiam EDVARDVS SIEVERS haud paucis locis me consilio et doctrina benigne adiuvit.

7. Praeter eos viros doctos quos de partibus quibusdam huius libri optime meritos esse grato animo professus sum, tres viri commemorandi sunt quorum studia et merita ad omnes partes pariter spectant: FRANCISCVS BVECHELER (= *Buech.*), GVILELMVS HERAEVS (= *H.*), FRIDERICVS SCHOELL: qui non modo plagulis emaculandis operam dedicaverunt salutarem typothetarumque vitia a me neglecta absterserunt, sed etiam meos errores non semel correxerunt, dubitationes modo moverunt modo removerunt, difficultates docte explicuerunt, corrupta feliciter emendaverunt: quorum nomina quod frequenter redeunt iuxta mecum gaudebunt qui hac sylloge utentur.
